EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. The application has been amended as follows:

Claim 17. (Currently amended) A ~~[[The]]~~ method for scheduling access to an access network from a mobile user terminal, the method comprising:

an access selector receiving a QoS profile representing an access technology independent information associated therewith from an application resident on the user terminal, the QoS profile specifying requirements of the application and the access selector being a network entity and provided separate from the user terminal;

the access selector comparing the access technology independent information in the QoS profile with access technology independent status information received from access networks that are available to the user terminal;

the access selector storing the QoS profile in case said comparison reveals there is no access network available that fulfils the QoS profile;

the access selector monitoring the status information received from available radio access networks; and

Art Unit: 2617

the access selector repeating the comparison step and instructing the application to execute when the comparison indicates an access network is available that fulfils the QoS profile,

wherein the access technology independent status information of a radio access network is a set of QoS related parameters relating to a traffic already existing in the radio access network, and the access technology independent information is a set of QoS related parameters defined as requirements associated with the resident application in the QoS profile.

Allowable Subject Matter

4. Claims 1 – 11 and 13 - 17 are allowed.

5. The following is an Examiner's statement of reasons for allowance: Claims 1 - 11 and 13 - 17 are allowable based on the Applicant's remarks filed on 09/08/2010. The claims are allowable over the prior arts of record (Chan et al. ("Mobility Management Incorporating Fuzzy Logic for a Heterogeneous IP Environment", IEEE Communication Magazine, December 2001) and Radhika (EP 1,091,528 A2)) because none of the references, either alone or in combination, discloses or renders obvious the method and system of providing simultaneous access to a plurality of radio based access networks from a moving system that comprises an access selector being a network entity provided separate from the user terminal, and structured to interact with applications

Art Unit: 2617

resident in the user terminal and to interact with each access selection adapter for selection of a radio access network based on an individual QoS profile representing an access technology independent information associated with each application and on said access technology independent status information, as defined in the Specification in combination with all other limitations in the claim(s) as defined by Applicant(s).

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
